

SWISS
CONSERVATION-RESTORATION
CAMPUS

Bachelor in Conservation

The Bachelor's programme in Conservation is fully modular and designed according to Swiss and European standards.

The full-time studies last three years and correspond to 180 ECTS credits. During the first two years students follow a coordinated curriculum defined by the four collaborating institutions and leading to commonly defined learning outcomes. In the third year students attend courses on a specific field of conservation at the institution responsible for it. Special conditions apply to the Abegg-Stiftung.

Master in Conservation-Restoration

The Master's programme in Conservation-Restoration prepares students for independent practice of the profession according to European ECCO and ENCoRE guidelines.

The full-time studies last two years and correspond to 120 ECTS credits. Each institution offers a Master's programme in the corresponding field of specialisation. Students develop conservation-restoration concepts on the basis of scientific, historical and technical knowledge.

The Swiss CRC

The Swiss Conservation-Restoration Campus (Swiss CRC) represents the four institutions responsible for education in conservation-restoration at university level. It offers a three year Bachelor's and a two year Master's programme. Each institution is a centre of learning and research with an interdisciplinary team of lecturers and professionals specialised in different fields of conservation-restoration. The titles conferred are recognized by the Swiss Confederation and they are valid internationally.

The Bachelor's programme in conservation emphasizes documentary work, condition assessment, preventive conservation and implementation of conservation measures.

The Master's programme develops intellectual and practical skills in a specialised field of conservation-restoration, requiring scientific and technical research.

Admission to the study programmes

Detailed information about the specific programmes and the conditions for admission is published on the websites of the participating institutions.

A collaboration for education and research
