

Bachelor in Conservation Master in Conservation-Restoration

Four schools, one mission:
Education and research for
the preservation of art and
cultural heritage

The Swiss Conservation-Restoration Campus (Swiss CRC)

The Swiss CRC is a network of the four institutions responsible for university level training in conservation-restoration and research in Switzerland. It offers a three year Bachelor's and a two year Master's program.

Excellence in education and research

Each institution is a center of education and research with an interdisciplinary team of lecturers, researchers and professionals specialized in the different fields of conservation-restoration.

Internationally recognized titles

The degrees are recognized by the Swiss Confederation and internationally, opening up career opportunities worldwide.

Partner institutions and specialisations

Abegg-Stiftung

Berner Fachhochschule BFH

- Archaeological and ethnological objects
- Scientific, technical and horological objects

BA in Conservation

Conservation is about understanding and preserving our shared history. During the Bachelor's program in Conservation students get a theoretical and practical training to understand, document and actively participate in the preservation of cultural heritage.

MA in Conservation-Restoration

During the Master's program in Conservation-Restoration students are trained to become fully qualified professionals, able to plan and realise direct and indirect treatments for a sustainable preservation of cultural heritage.
